AV Safe
Safety and security all along the way.

ADAS & DSM

The ADAS (Advanced Driver Assistance System) and DSM (Driver Status Monitor) solution is an intelligent and autonomous system that detects and alerts unwanted driver behaviors (fatigue, distraction, cell phone use and smoking), as well as possible frontal collisions or lane changing without the use of signal lights. This system is run in conjunction with vehicle DVRs and is managed through exclusive software or via web interface. All this in a quick and easy way, simplifying your fleet management.
